0.1 About the purpose of this text

This is a IATeX, BibIATeX, proScientia.ltx and Lilypond based template which is part of proMusicologica.ltx. It is intended to facilitate the writing of musicological books and demonstrates its purpose by showing the quotation system and some inline and autonomous sheet music sample. Please replace that content by your own text.

1 Integrating Quotations and References

1.1 Verifying the Quotation Marks

- "A citation with 'an embedded citation". Expected Result: English quotation marks
- An English Sentence "mit einer fremdsprachlichen Phrase" as an embedded quotation. Expected result: German quotation marks for for the embedded phrase.
- A quoted autonomous English sentence:

"This shall represent an English written paragraph containing a set of sentences which together build the quote."

Expected result: English quotation marks.

• A quoted autonomous German sentence:

"Dies soll einen deutschsprachigen Absatz repräsentoieren mit mehreren Sätzen repräsentieren, die zusammen das Zitat bilden."

Expected result: German quotation marks, because an automous German sentence is quoted.

1.2 Verifying citation references

- Book 1 (quoted for the first time)¹
- idem ibid.²
- idem. loc. cit.³
- Book 2 (quoted for the first time)⁴
- Book 1 (quoted again)⁵

 Nach Grabner das nächste, kommende Jahrhundertwerk zur Harmonieanalyse, das mit seiner Verlagerung des Schwerpunktes in die Funktionstheorie einen wesentlichen Fortschritt gegenüber älteren Lehrwerken bedeutete.
